THE FONTS FOUNDRY

Another
Shabby

THIS IS NOT A FREE FONT

Another Shabby is distributed with a **free for personal / non commercial use license** provided with the download. It allows unlimited use of the font(s) on all personal CPUs for **non-commercial uses** (i.e. no-profit projects, student work, pro-bono assignments).

If you're designing a Logo or artwork for print or digital advertising, and are the sole author of the design you need to buy a **Personal License**.

If you're designing a Logo or artwork for print or digital advertising, and are part of a two-five people studio you need the **Small Studio License**.

Both the personal and small studio licenses apply to web/app use of your design, as long as it stays in rasterized form; if you plan to use include the font in a website or in an app for dynamic text generation (e.g. *font-face*) you need the **Software/Internet License**.

All the above licenses don't apply to broadcast use (designing logos or dynamic text for broadcast/tv/cinema).

If you plan to use include the font as part of dynamic or static typesetting for broadcast use, you need the **Broadcast License**.

All the above licenses don't allow for redistribution of the font to your client or his employees (eg. corporate font usage). If you want your client to be able to use personally the font to adapt/modify your design, he must buy a Personal or Small Business License.

If your client is a corporate entity that wants to freely distribute the font to employees and agencies for brand/product development, a **Worldwide License** is necessary.

Feel free to contact us for further enquiries.

INSTALLATION

MACINTOSH OSX INSTRUCTIONS

Download the font file archive (.zip) from the site **www.zetafonts.com**, saving it in a folder, then extract the file from the archive with the shell (right clic) or with software (e.g. Winzip).

To install, simply click on the font file to install using System Font Book, or copy the fonts to the "Fonts" folder inside your "Library" folder. If you want your fonts to be available to applications running in "Classic" mode, copy your fonts in the OS 9.1 System folder in the "Fonts" folder.

Fonts installed in the OS 9.1 System folder will also be available in OSX in classic applications.

WINDOWS INSTRUCTIONS

Download the font file archive (.zip) from the site **www.zetafonts.com**, saving it in a folder, then extract the file from the archive with the shell (right clic) or with software (e.g. Winzip). Open Control Panel and double-click the Fonts folder, then go to the "file" menu and select "Install new font"

Browse to the location where you extracted the .zip file, select and click OK.
